

Engineered & Built in the USA

For more than 70 years, **Pacific Press Technologies** has been known for quality machines designed and built in Mt. Carmel, Illinois. At Pacific, we are recognized for developing flexible and agile automation systems for a wide variety of manufacturing operations.

Pacific designs and fully integrates solutions to maximize efficiencies and ultimately reduce operating costs. Avoid the perceived need to coordinate your own system and trust the leading metal forming OEM in the industry to help your business grow today.

Unique manufacturing capabilities help provide your business with the competitive edge required to succeed in today's global marketplace. With decades of experience building robust machinery, Pacific's seasoned team of experts are available to work with clients on custom machinery solutions that meet the toughest application requirements.

Robotic Integration

Automated Solutions

TURN-KEY SYSTEM BENEFITS

- **Equipment fully integrated by OEM**
- **Single source supplier** eliminating the need for multiple vendors for the production of one system
- Integrated automation **improves equipment safety**
- **Save time** with collaborative robotics

Allow Pacific to design, coordinate, test, and validate your system for you!

Material Handling

INTEGRATED SOLUTIONS CAN INCLUDE:

- Robotic integration
- Feeding systems
- Conveyors & material handling
- Customized software

BENEFITS OF AUTOMATION

- **Minimal Training** - A carefully planned automated process provides easy, intuitive programming that requires minimal operator skill and training.
- **Flexible** - Agility to meet changing demands of the workplace.
- **Collaborative** - Safe robotics can work alongside humans with no safety shield.
- **Fast Payback** - With lower production costs, an investment in automation will save your company money.

HOW DOES THE PROCESS WORK?

Pacific's experienced engineers will visit your business to learn more about your application, or you can visit us! Pacific will work with you to fully understand:

- The intended application of the machine
- The process you are currently using, or hope to use with your new system
- Desired material to be used and its properties
- The desired starting and finishing product size or dimensions

We are committed to working with you through every step of the process to ensure our final integrated solution meets your production requirements.

EXISTING EQUIPMENT

In addition to designing brand new systems, Pacific can also retrofit an integrated system around an existing piece of Pacific Press equipment. Contact us today to learn more.
